Managed Smart Metering

Monitor, and Save!

Ecolec 300 series

Big or small we have an energy management solution that will work for your business

Managed Smart Metering

Connected Energy Metering with Cloud monitoring and management

Our Energy Management solution is a powerful energy control and management system, developed to reduce electricity bills and manage business operations better.

Get to know exactly what is happening with your electricity.

Astute Smart Range

The Astute Range consists of the ASC, ASI, ASP and ASP-D devices which are energy monitoring, scheduling and control devices with load management and automation capability.

Take control of your energy consumption, remotely control your office devices with the CBI Home App. The CBI Astute Range of products can be used to remotely control office air cons, lights, geysers and limit the use of high consuming loads like hand dryers and hydroboils.

EBM Meters

The Ecolec 300 series is a Class 1 electricity meter that shows the consumption of the installation.

The meter has an electro-mechanical counter display with a seven digit indication of energy consumed to 1 / 10 kWh. It's dual colour lamp shows the rate of consumption and confirms the presence of incoming power supply and some unsafe / error conditions.

The meter is reverse feedable and measures consumption correctly.

Our team is excited to work with you, to help implement any of our business energy saving solutions and keep the lights on in our neighbourhood
